

**You've always
known what to
expect from
a video game
system.**

NEC

Until now.

Introducing the TurboGrafx-16 video game system.

TurboGrafx-16 is the video game system that's built around a 16-bit graphics processor. Compared to the 8-bit systems you're used to, it's four times faster, with better graphics, almost ten times as many colors, head-splitting stereo sound and deeper, more challeng-

ing gameplay.

In short, the bad guys are bigger, the good guys are smarter, the action is faster, and the challenge is greater.

TurboGrafx-16 gives you dozens of great game titles to choose from. As well as optional accessories that let you expand your system.

For example, there's a

CD player that plays video games in addition to audio disks. A TurboBooster™ audio/video enhancer. Even a TurboTap™ connector that lets up to five friends play all at the same time.

TurboGrafx-16. Because the last thing a video game system should be is predictable.
